Ana Pais

More than Honey, Lda

How did it Start?

Ana and Carla, granddaughters of a beekeeper and inspired by him, are completely passionate about bees, honey, and innovation.

Beesweet was born from the dream of promoting bee protection and introducing the world to innovative honey-based products.

Organic Honey

Beesweet sells organic honey with aromatic plants.

The processes are natural, preserving the pure characteristics of this product made by bees.

Medicinal Value

Since the company uses medicinal plants in its flavoring process and based on laboratory studies conducted, it believes it is enhancing the honey in terms of health and wellness benefits for consumers.

BEE SWEET Challenge

We are looking for **CLEAN LABEL, INNOVATIVE PACKAGING SOLUTIONS**

Our challenge focuses on clean label, innovative packaging solutions that emphasize sustainability. The ideal packaging should feature **minimal ingredients and materials, offering creative and eco-friendly alternatives to traditional methods.** These solutions should meet the growing consumer demand for authenticity and sustainability, enhancing product appeal while minimizing environmental impact. The packaging design must be as shown in the left figure, **a water drop.**
