

Agricultural Advisors Training Course

🧑🏫 Empowering advisors means empowering farmers. Let's lead the transition together toward smarter, greener, and more resilient agriculture.

OVERVIEW

Agricultural advisors are key enablers of change. They bridge the gap between innovation and practice, guiding farmers through new challenges and opportunities in a fast-evolving sector. To remain effective in this role, advisors need continuous access to targeted training and resources. That's why this program has been specially designed to support and upskill advisors in the context of digital transformation and sustainable agriculture.
